IT & BUSINESS SYSTEMS SPECIALIST

PROFESSIONAL SUMMARY

IT professional with experience in business systems analysis, software development, data management, and process improvement. Skilled in translating operational needs into digital solutions, automating workflows, and supporting reporting and decision-making. Experience also includes Machine Learning applications, AI-assisted development, digital marketing, and bookkeeping support.

PROFESSIONAL EXPERIENCE

IT & Business Systems Specialist | Prodisenyo Builders Corp. | Cagayan de Oro 2026 - Present

- Develop, maintain, and enhance internal business software supporting engineering, project management, HR, payroll, purchasing, budgeting, and management reporting.
- Translate operational needs into role-based features, refine approval and reporting workflows, and resolve system issues to reduce repetitive manual work.
- Use AI-assisted development and productivity tools to accelerate prototyping, documentation, troubleshooting, and operational process improvements.
- Support the company's digital marketing through regular Facebook content publishing, marketing assets, and campaign coordination.
- Assist with bookkeeping-related workflows, including spreadsheet organization, expense and purchase records, and data checking for internal reporting.

Business Systems Analyst Intern | Prodisenyo Builders Corp. | Cagayan de Oro Feb 2026 - May 2026

- Analyzed payroll and business workflows and translated requirements into a role-based enterprise platform for attendance, approvals, budgeting, and reporting.
- Implemented biometric attendance and payroll automation and helped address workflow validation and data consistency issues.
- Identified data inconsistencies and workflow bottlenecks, and supported system testing and validation to improve day-to-day reliability.

Paralegal Assistant | Quill & Arrow LLP | California | Remote Aug 2025 - Apr 2026

- Maintained legal records, case schedules, and document workflows; supported accurate information retrieval and administrative coordination.
- Coordinated document preparation, review, and distribution with attorneys and internal teams to support timely case administration.
- Organized schedules, tracked tasks, and maintained structured case information to improve document retrieval and workflow consistency.

SELECTED PROJECTS

Prodisenyo Probuild | Construction Management Platform

- Developed and iteratively improved a role-based enterprise platform connecting payroll, attendance, approvals, project budgets, cost tracking, and departmental reporting.
- Automated biometric attendance and payroll workflows, approval processes, and project cost-tracking to improve reporting efficiency.

Archivia | Machine Learning Adviser Recommender and Digital Thesis Archive | Best Capstone Award

- Built a searchable academic repository and adviser recommendation system using TF-IDF and SBERT semantic similarity, with role-based access and structured records.
- Implemented searchable indexing, role-based access, and structured academic records to support efficient retrieval and adviser selection.
